Fire Load Distribution Cabinets

Provides distribution cabinets for fire protection systems to ensure rapid power supply and proper operation of fire protection equipment in emergency situations.

Functional Features

- Fire protection design
- Real-time monitoring function
- High safety

Applicable Scenarios

- · Fire control center
- · Fire pump station
- · Fire alarm system
- · Fire supplement / exhaust system

Technical specifications

Parameter	Value
Voltage Rating	220V/690V
Maximum power	50kW
Material	fireproof aluminum alloy
Wiring method	flexible wiring

Our fire protection distribution panels are designed to provide reliable power supply for fire protection systems. With fire-resistant construction and real-time monitoring capabilities, they ensure safety and functionality in critical situations.
